

Naftali Segal

Ottawa, ON | naftalissegals@gmail.com | [linkedin.com/in/naftali-segal](https://www.linkedin.com/in/naftali-segal)

B.Tech (Business Systems Development) student bridging business and software. Hands-on with Python, Java, and SQL (MySQL/PostgreSQL); built and deployed a scheduled internship scraper on GitHub Actions and prototyped a full-stack iOS app on AWS.

EDUCATION

Algonquin College

Ottawa, ON | 2025 – Expected 2029

Bachelor of Technology (Business Systems Development) (Honours), In Progress. **GPA: 3.58 (cumulative through Winter 2026).**

Relevant coursework: CST3101 Database Design Fundamentals (MySQL), CST3100 Intro to Programming (Java, A+), CST3102 Programming, CST3103 Data Communication & Networking, CST3105 Advanced Database Design & SQL (PL/SQL, cloud DB), CST3106 Internet Architecture & Web Development (JS, REST/JSON), CST3107 Operating Systems, MGT4102 Business Fundamentals, MGT4701 Advanced Business Statistics, ESC4402 ERP Business Configuration, MAT8003 Mathematics for Programming, PHI1000 Logic & Critical Thinking.

Prior coursework at Carleton University (2023 – 2025): business fundamentals, intro programming in C, intro finance, marketing, intro International Business.

PROJECTS

Internship Scraper (Personal Project) | github.com/Naftali-S/internship-scraper

2026 – Present

- Built a Python scraper that monitors 52 companies across 11 job-board platforms (Workday, Oracle Recruiting Cloud, Eightfold, SmartRecruiters, Ashby, Lever, Workable) for summer internships in Ottawa/Kanata/Canada-remote.
- Reverse-engineered each platform's JSON API from browser dev tools; no headless browser and no HTML parsing, so the scraper is faster and more resilient than DOM-scraping approaches.
- Diffs each run against a committed SQLite database so state travels with the repo across GitHub Actions runs; emails only new postings via Gmail. Runs daily on GitHub Actions.

Financial Literacy & Payment App (Academic Project, with partner)

Feb 2024 – Sep 2024

- Modeled a relational data schema (PostgreSQL on AWS RDS) and wrote SQL (joins, aggregates, subqueries) for planned app workflows: login, recommendations, and education modules.
- Prototyped a SwiftUI iOS client backed by REST endpoints served from AWS Lambda; validated end-to-end data flow from database to API to UI.
- Documented the architecture and iterated on requirements with a partner; project was paused before ship.

EXPERIENCE

Shift Supervisor | Subway

Ottawa, ON | Jul 2021 – Present

- Run the store as the on-shift authority on evening and closing shifts; responsible for the staff member on duty, service quality, and end-of-day operations.
- Daily cash control: cashouts, deposits, paperwork, and reconciliation of all totals.
- Trained 20+ staff over 5+ years across health, safety, and operational procedures.
- De-escalate customer disputes and difficult situations calmly, keeping the store safe and orderly during peak periods.

Guest Services Attendant | Carleton University Athletics

Ottawa, ON | Jul 2024 – Apr 2026

- Support varsity events (200–1,000 attendees): setup/teardown, ticket scanning and sales, and front-line issue resolution.
- Collaborate with staff to keep entry flow smooth and safe during peak traffic.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL (MySQL, PostgreSQL); familiar with SwiftUI.

Tools & Cloud: Git / GitHub, GitHub Actions, SQLite; AWS (EC2, RDS, Lambda) from project work.

Business & Analysis: Requirements-to-solution thinking, process documentation, ERP business configuration (coursework), reporting and data consolidation with SQL.

LANGUAGES

English (native); French (conversational).
